What are people saying about us.....

Wow - cram-packed course that well exceeded all expectations. I'll be back and I'll be recommending this course and all first aid courses First Response delivers to my professional colleagues and students. Zachery, Trainer, Alliance Safety Group, 2014

As one who may go for long periods without having to use these skills such refreshers are vital to maintaining an ability to correctly work as an EMT - M Aichino, Cairns, 2014.

I have completed my Certificate IV EMT course with FRA in 2008 and have returned annually to undergo professional training with the PHERT courses. I have also undergone other training in that time like Low Voltage Rescue, Certificate III in Emergency Medical Care. I have also participated as a Co-Provider for FRA to deliver Apply First Aid, CPR, LVR courses at my work site. I have always found the staff at FRA very professional, knowledgeable and always willing to take time out to help. Love the scenarios guys. Tony, Safety & Training Officer, Snow Peak Mining, 2014

As always - great re-affirmation of skills at a high level. FRA remain the most relevant and advanced training providers. Justin, Emergency Response and Safety Coordinator, Carpentaria Gold, 2014

The training provided by First Response far exceeded expectations. Charlie and his team always conducted themselves in the most professional manner. I strongly recommend the course for anyone considering the EMT package and am confident in saying the training provided is all of the highest calibre and you won't find better in Australia - T Murray, 2014

As I work with a range of individuals, teams and demographics in my works and concerning their work in locations and situations all over Australia, I find the experience and depth of knowledge of the FRA Trainers provides a real, current and relevant training experience. FRA's experience with remote area mine sites is also particularly instructive for me in considering similar locations. Troy, Health, Safety & Environment Coordinator, 2014

After completing the EMT-B Certificate 5 years ago, it was a great opportunity to refresh skills, and learn new techniques in the pre-hospital setting. The training was delivered as promised - practical based workshops to scenarios. The trainers' added value to presentations by focusing on real time incidents/events which provided context for the participants. The other great aspect was having exposure to EMTs in the class to learn the finer points of medical care through their experience overall, a thoroughly enjoyable and rewarding 3 days. Shane, International & Executive Security Manager, Commonwealth Bank of Australia, 2014

FRA always provide a great training environment by using a good range of the latest equipment and training methods to ensure a variety of learning techniques for the students. Have used FRA many times in the past and will continue to use them in the future with upgraded training packages. Garry, Safety & Emergency Response Coordinator, Evolution Mining, 2014

- **Quality training by industry professionals utilising current and latest innovative equipment.**
- **Scenario (hands on) based training - no boring programs here!**
- **Customise training to suit your organisational needs and equipment.**
- **Corporate rates available.**
- **Remind you when your qualifications are due for renewal.**
- **Compliment all training with opportunity to purchase suitable equipment.**
- **Servicing of specialised equipment.**
- **Onsite maintenance checks of specialised equipment.**
- **Provide 'Training Agreements' for organisations that require regular customised training where First Response ensures all employee qualifications remain current (conditions apply). Takes the burden off HR.**
- **Provide handy credit card size qualification cards for LVR and EMT.**
- **Provide a private forum for you to discuss an incident that you may have been involved in.**
- **Ensure your training experience with FRA is enjoyable as possible.**

Courses in this Booklet are our **Public Scheduled** programs. If you have a group of people and would like for First Response Australia to visit your premises to conduct training (on site) at a time suitable to your employees, please contact our office on
