How LTS Works

LTS is a Load Tension System that acts as a shock absorber for your load. It is the only restraint that can adjust, adapt & absorb on the run. The distinguishing feature of LTS is the fluorescent orange compression sleeve.

LTS can compensate for this gap when the trailers load shifts after turning a corner

As little as 25mm of settlement/compression, can result in loss of restraint, load or life without LTS

LTS can adjust to absorb the compression of the corner of this carton caused by the tie downs tension

- Premium polyester webbing with less than 3% elongation
- Larger hooks
- High frequency heat treated mechanism & hooks

PREVENT A FLAT

PREVENT A FLAT
\$15
LA515U

Prevent a flat before it happens. Australian made. Environmentally friendly. Won't block valve stem core. You can still patch tyres. Less expensive than all other sealants.

The product remains liquid inside the tube, therefore won't harden or ball up so will continue to work for the life of the tube.

ANIMAL REPELLERS

Protect wildlife and your vehicle. Install animal repellers to the front of your vehicle. Repeller emits a high frequency sound while travelling at speed, warning animals of approaching vehicle.

BE SAFE AS YOU TRAVEL
